

Span-Lok^{hp}

RIGOROUSLY TESTED

SO YOU'RE REPUTATION WON'T BE.

Our wind uplift and water infiltration testing — the most rigorous in the business — has led to AEP Span's reputation for amazingly durable coated steel roofs and walls. **Span-Lok hp has been designed and tested to withstand wind loads exceeding 250 psf.** Add to that our remarkable on-time delivery record and you have a partner who is determined to burnish your reputation.

Speaking of looking good, our roofs and walls come in 22 cool colors, each meeting a minimum 29 Solar Reflectivity Index (SRI). And all that casts you in a very positive light.
