

Mini-V-Beam is an exposed-fastened metal panel with 32" net coverage.

Mini-V-Beam is ideal for roof, vertical or horizontal wall applications, open framed canopy or carport designs.

Properties									Standard Finishes

NOTES: The moments of inertia, I* and I-, presented for determining deflection are: $(2I_{\text{Effective}} + I_{\text{Cross}})/3$

standard features

- Minimum recommended slope 1:12.
- Gauges: 22ga, 24ga, 26ga and 29ga in standard finishes and 20ga available in ZINCALUME® Plus.
- Refer to AEP Span Color Charts for full range of color options and paint systems.
- Custom manufactured panel lengths: 5'-0" to 45'-0".
- Matching fiberglass panels available.
- Testing: ASTM E1680 (air infiltration) and ASTM E1646 (water infiltration). All testing performed by accredited third-party.
- Roof assemblies Class A Fire Rated when installed on non-combustible deck or framing per IBC or IRC or when installed in accordance to UL listings (UL790). Wall assemblies rated for fire resistance (UL263) when installed in accordance with UL listings.
- Building Code Approval Report: IAPMO-UES #ER-0550. 
- Manufactured in Tacoma, WA.

optional features

- Short cut sheets from 5'-0" to 1'-0". Additional fees and lead times apply.
- 20ga and 18ga available in G-90 with standard and custom colors subject to a minimum order size of 4,500 square feet and longer lead times.
- 18ga available in bare G-90 galvanized subject to a minimum order size of 18,000 square feet and longer lead times.
- Custom colors, thick film primer and/or clear coat paint finishes available. Subject to 4,500 square feet minimum order.
- Perforation options available for an additional charge. Minimum order size 1,335 square feet (Inquire for smaller orders). Select from standard perforation patterns with open areas of 7.8%, 13.8%, 23.4% or 30.6%.
- Stucco embossed available in 26ga, 24ga and 22ga. Subject to minimum order size of 1,335 square feet.

Inward Loads	Single Span		<p>NOTES:</p> <p>Top values based on allowable stress (ASD). Bottom values based on a deflection limit of L/180.</p> <p>“-” denotes that the allowable load is limited by the panel stress vs. deflection limit.</p> <p>Steel conforms to ASTM A653 (Galvanized) or ASTM A792 (ZINCALUME) structural steel.</p> <p>Tabulated values are for positive (inward) uniform loading only.</p> <p>Values are based on the American Iron and Steel Institute “Cold Formed Steel Design Manual” (AISI S100-12).</p> <p>Refer to aepspan.com for more complete Mini-V-Beam performance data.</p>
	Double Span		
	Triple Span		

Oil Canning : All flat metal surfaces can display waviness commonly referred to as “oil canning”. “Oil canning” is an inherent characteristic of steel products, not a defect, and therefore is not a cause for panel rejection.
