

SUNSKY[®] POLYCARBONATE SKYLIGHT & SIDELIGHT PANELS

SUNSKY Polycarbonate Panels offer multiple advantages over traditional fiberglass corrugated panels. Designed specifically to withstand punishing climates and harsh exterior conditions, Sunsky panels are ideal for agricultural, patio cover, and industrial workshop applications.

Features and Benefits:

- Polycarbonate panels are virtually unbreakable, offering up to 20 times greater impact resistance compared to a fiberglass panel.
- Panels retain optical clarity far better than any other glazing material for increased light transmission, while offering 100% UV protection.
- Panel profiles can handle extreme climates (-40°F to 270°F).
- Easily and safely installed.
- Panel provides highest resistance to wind uplift and hail protection compared to a fiberglass panel.
- All panels come with 10-Year warranty.
- Matches Super-Span (1.5mm).
- UL 580 CLASS 90 recognized and classified.

Oil Canning : All flat metal surfaces can display waviness commonly referred to as "oil canning". "Oil canning" is an inherent characteristic of steel products, not a defect, and therefore is not a cause for panel rejection.
