

**LEED v4 Sustainable Sites (SS):
SSc5 Heat Island Reduction for AEP Span**

Applicable Credits:

SSc5.1 OPTION 1. Heat Island Reduction (1-2 points)

AEP Span architectural metal roof panels are available in a range of colors which meet or exceed LEED® v4 criteria for the Heat Island Reduction credit.

The criteria for this credit requires that roofing materials have a Solar Reflectance Index (SRI) equal to or greater than the three-year aged SRI values in Table 1 below. If three-year aged value information is not available, use materials that meet initial SRI values.

	Slope	Initial SRI	3-Year Aged SRI
Low Sloped Roof	≤2:12	82	64
Steep Sloped Roof	≥2:12	39	32

Table 1. Minimum solar reflectance index value, by roof slope

Refer to the AEP Span Color Performance Data chart for information on solar reflectance, thermal emissivity, and SRI values for our cool metal roof colors.

Notable Reference:

This credit is achieved through a combination of non-roof and roof measures to reduce heat islands. The following calculation determines if a project design meets the credit threshold:

$$\begin{array}{ccccccc}
 \frac{\text{Area of Nonroof Measures}}{0.5} & + & \frac{\text{Area of High-Reflectance Roof}}{0.75} & + & \frac{\text{Area of Vegetated Roof}}{0.75} & \geq & \frac{\text{Total Site Paving Area}}{\text{Total Roof Area}}
 \end{array}$$

Initial SRI thresholds for roofing materials has increased from LEEDv2009.

LEED v4 now factors in a three-year aged SRI value for roofing material, which measures solar performance over time. The Cool Roof Rating Council (CRRC) website lists AEP Span three-year aged information. Note that the CRRC initial and three-year SRI values are based on generalized “color families.” The data listed on the CRRC website is very conservative as it does not reflect the actual performance of each color. AEP Span does not have three-year aged SRI values for each of its colors.

AEP Span Color Performance Data

Please note that color specific *CRRRC Notification of Product Rating* can be produced upon request
