

PROJECT SPOTLIGHT:

SKY RANCH MIDDLE SCHOOL

RENO, NV

Situated in the sparse desert highlands at the base of the Eastern Sierra, sits this charismatic middle school. For this project, metal siding was selected to add depth and unique appeal to this expansive campus. AEP Span metal siding panels were the preferred product of choice for this facade due to their color versatility, long term durability and low maintenance qualities.

This project features AEP Span's Select Seam® panels in a Sedona Rust print and Vintage® coating, providing rich accent pieces that integrate effectively with the desert hues of the Reno area and the earth tones of the masonry siding. Much like the desert landscape, these colors provide evolving color as the light changes throughout the day. Applied to standing-seam siding of varying widths, the panel ribs provide varied texture to the facade and capitalize on dynamic shadows to further accentuate the siding color.

Architect: Van Woert Bigotti Architects

Contractor: Core Construction

Installer: Alpine Roofing Co.
