

ADD SUBTLE TEXTURE AND DEPTH WITH STUCCO EMBOSSING

AEP Span offers embossing as a special order enhancement, bringing added texture, visual depth, and functional benefits to select metal roof and wall systems. This optional feature transforms flat metal surfaces with a non-directional stucco embossed pattern.

Embossing is subject to minimum order requirements and longer lead times. Inquire with your AEP Span sales representative for more information.

Features and Benefits:

- **Enhanced Visual Depth:** Adds subtle texture that interacts with light for a more dynamic appearance.
- **Minimizes Oil Canning Appearance:** Helps minimize the visual effects of waviness in flat metal panels
- **Expanded Design Flexibility:** Ideal for projects seeking added dimension without altering panel profiles.
- **Improved Durability:** Textured surfaces help mask minor handling marks and jobsite wear.
- **Consistent Finish Quality:** Produced under controlled conditions for uniform appearance.
- **Supports Architectural Finishes:** Ideal for projects requiring elevated design detail and texture
- **Available in a Wide Range of Panels:** Offered as a special order for a variety of metal roofing and siding panels. for uniform appearance.
